Cyber security asset management

Datasheet

Maintaining an accurate, up-to-date inventory of systems that need securing is hard

That's because there's a problem with how the industry handles asset management.

Asset management systems were never built for security. IT teams struggle with multiple disconnected systems. These typically require "agents" to be manually installed on devices. This means devices can be missed, data is spread over multiple systems and hard to collate.

In today's world of IoT, all kinds of new devices are being added to networks with no way of installing agents on them.

“

“With Rebasoft I can now see all my network attached devices - in one system - and validate them for compliance purposes”

CISO, charity

These are the problems we hear:

- **Struggling to collate data** from disparate systems
- **Unmanaged “missing” systems** which are hard to find
- **Collecting sufficient data** to perform security audits and tasks
- **Manual processes needed** to collate data for reporting or standard compliance purposes

Rebasoft can help

The base of the Rebasoft platform is an agentless asset discovery and management system, providing real-time data of everything connected to your network.

- **Find everything** with network based discovery
- **Integrated discovery** with data collected from multiple managers
- **Identify** unknown/rogue systems
- **No disruptions** - it's lightweight, so you can see what you want, when you want
- **Simple** - there's no need to install any additional hardware or software
- **Feeds directly into other processes** like secure configuration & vulnerability management

So, you'll finally be able to say with confidence "this is what we have."

How we provide value

Rebasoft discovers, assesses and tracks security compliance all from one system.

- **A single deployment** collecting and consolidating information means you do not need humans to manually collate and report on data
- **Integration into asset management** means you do not need to spend hours tracking down systems that need security remediation
- **Lightweight**—collecting information effectively and automatically reduces the load on managed IT systems
- **Fewer systems and automation** helps reduce complexity and workload on busy IT teams
- **Automation** helps eliminate manual tasks and reduces human error

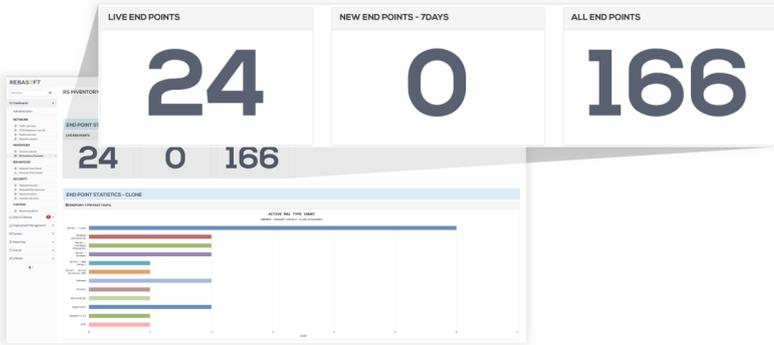

“

"We could reduce our security system needs by 60% with Rebasoft"

CISO, Retail

The Rebasoft asset management system

See everything

Asset discovery & inventory

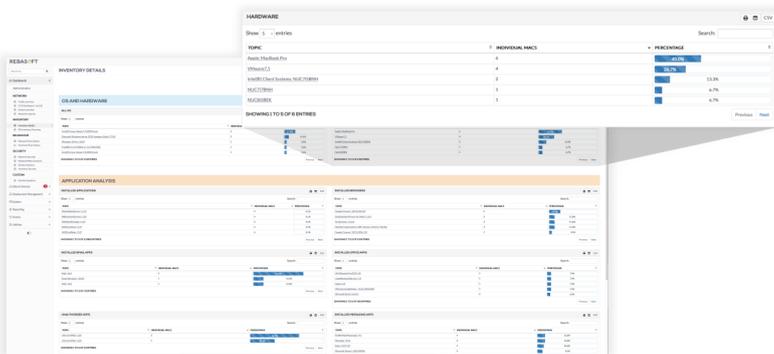

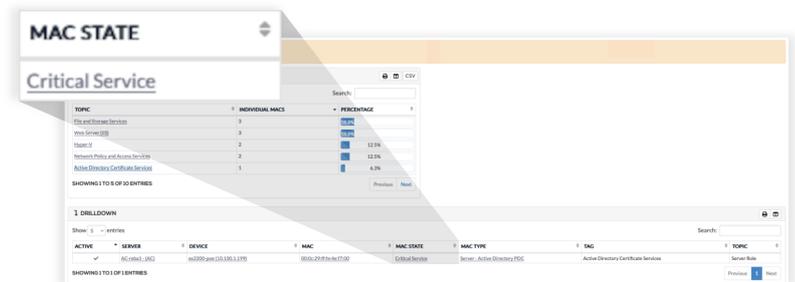

Within minutes of deployment, Rebasoft will show you every device on your network in real-time:

- Provides agentless asset discovery
- Uses network infrastructure to build a real-time asset inventory
- Classifies systems based upon collected data
- Finds remote workers through MDMs like Intune
- Provides easy reporting for cyber security standards

Criticality & prioritisation

With Rebasoft you can set importance criteria for systems.

Make data-based decisions for spending and responding to cyber security issues

Device details

Rebasoft collects and maintains detailed hardware and software information like:

- Hardware model
- Location
- Operating systems
- Installed applications
- Users

But that's just the start

Using the asset management system as a base, Rebasoft provides the functionalities of multiple cyber security programs like:

- Asset management
- Secure configuration
- Vulnerability management

So with Rebasoft, you can cover the same ground with less solutions. So, you can save money and reduce complexity, because it's all seamlessly integrated.

So why not find out more by booking a live demo with an expert?

Try it now

There's nothing like seeing it in action. After all, you wouldn't buy a car without test driving it.

About us

We at Rebasoft are committed to delivering a robust cyber security solution that addresses genuine business needs. We are not interested in a "silver bullet" approach. We believe that multiple functionalities from one platform and real-time data are essential for keeping up with today's cyber threat landscape. We believe this approach is the future of cyber security and we aim to be the pioneers. We are proudly a UK based company. Visit us at www.rebasoft.net
