Company overview

Datasheet

The world has entered a new era of cyber attacks

Most experts now believe that a catastrophic cyber incident is moderately or very likely to happen in the next two years.

Conditions are ripe for cyber attacks right now. There's political chaos, a reliance on new, rapidly evolving technologies and attacks that are more sophisticated than ever. You can see this in the recent series of devastating, high profile cyber attacks.

To tackle these issues, businesses need to spend more time building a long term security strategy, involving every area of business.

“

“With Rebasoft I can now see all my network attached devices - in one system - and validate them for compliance purposes”

CISO, charity

But IT teams are over stretched

IT teams want to spend more time building a proactive security strategy. But no one has the time. Any prevention is overshadowed by “putting out fires.” Business face staff shortages and don't have the resources to free up time.

Today's cyber security approach is less than ideal for dealing with this. It involves buying a dozen different solutions and patching them together manually. This requires a lot of manual work that could be automated or streamlined.

These are the problems we hear:

- **Paying for expensive software** for a complex “patchwork of programs”
- **Jumping between programs** just to do one job
- **Manually resolving vulnerabilities** from excel spreadsheets
- **Gaps in what you can see** due to intermittent scans

Rebasoft can take the weight off

Rebasoft lets you see everything on your network, asses critical security controls and manage vulnerabilities all from one program.

- **A single deployment** collecting and consolidating information means you can save time from doing it manually
- **Integration into asset management** means you don't need to waste hours tracking down systems that need security remediation
- **Lightweight**—collecting information effectively and automatically reduces the load on IT systems
- **Fewer systems** helps reduce complexity, costs and workload on busy IT teams
- **Automation** helps eliminate manual tasks and reduces human error

We believe that consolidating multiple security functions into one program and using real-time data is essential for keeping up with today's cyber needs. We believe that this approach is the future of cyber security

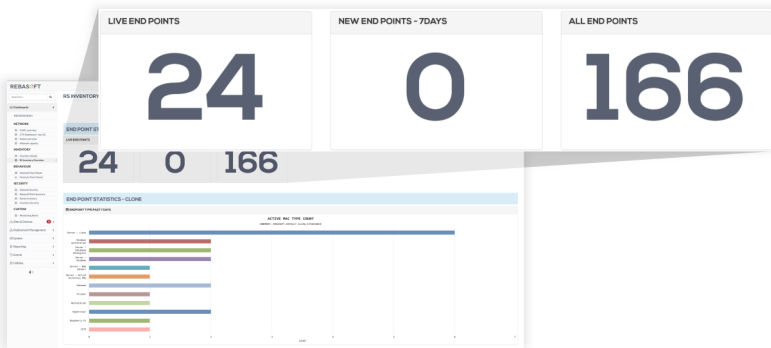

“

“... if you have a number of alerts being triggered in ten different systems it is quite hard to track them through to conclusion. One system allows us to easily drill through to the issue and rapidly resolve it.”

CIO, Hi-tech

The Rebasoft Security Platform

Three core solutions, one unified platform

See everything

Cyber security asset management

Asset discovery & inventory - discover and classify all IT assets in real-time with Net-Flow

Criticality & prioritisation - set priority for critical devices that you couldn't function without

Device details - see location, hardware model, operating systems, installed applications, users etc.

Secure everything

Policy compliance

Secure configuration - secure your devices and software with the right settings

Network perimeter security - find and secure all edge points

Malware coverage - ensure anti-malware is enabled on all endpoints

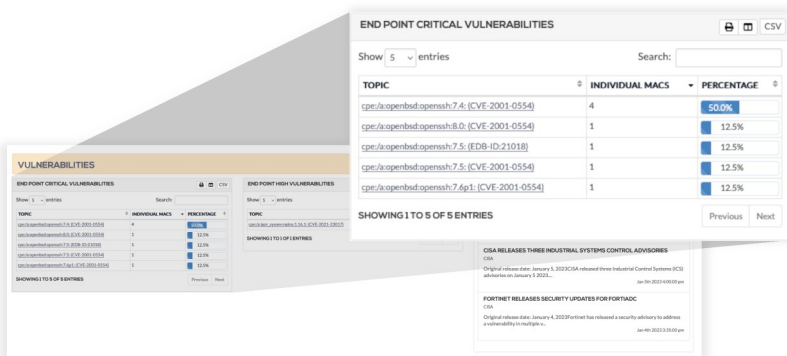

Defend everything

Real-time security

Vulnerability management - keep software patched and up to date without disruptions

Behaviour monitoring - monitor network usage for suspicious activity in real time

Automation - set up protocols to automate security

Rebasoft is an all-in-one system

Rebasoft provides the functionalities of multiple cyber security programs in one. So with Rebasoft, you can cover the same ground with less solutions and it's all seamlessly integrated. So you can:

- Reduce the number of solutions you need
- Save money
- Reduce complexity

So why not find out more by booking a live demo with an expert?

Try it now

There's nothing like seeing it in action. After all, you wouldn't buy a car without test driving it.

About us

We at Rebasoft are committed to delivering a robust cyber security solution that addresses genuine business needs. We are not interested in a "silver bullet" approach. We believe that multiple functionalities from one platform and real-time data are essential for keeping up with today's cyber threat landscape. We believe this approach is the future of cyber security and we aim to be the pioneers. We are proudly a UK based company. Visit us at www.rebasoft.net
