

## See. Secure. Defend. Everything, in real-time.

Identify every asset and vulnerability across your IT estate, reduce cost and complexity in a single unified platform.

### Cyber security is broken

Cyber attacks are accelerating. There's a growing cyber crime industry, projected to cost businesses an estimated [\\$10.5 trillion by 2025](#).

Clearly, current security software isn't fit for purpose anymore.

### What's going wrong?

Traditional cyber security solutions on the market aren't cut out to keep up with modern cyber needs. Businesses face rising costs and staff shortages, and need a more effective way.

#### 1 Solutions are silo'd.

The threat landscape is growing, organisations need more tools to deal with it. But the result is 'tool sprawl', you have so many solutions, it's just too much for your staff to learn and manage.

#### 2 There is no single source of truth.

Traditional asset management was built for ITIL, not for security. Scans and agents don't account for everything, leaving gaps in visibility. And data is often misaligned between a dozen programs, resulting in frustrating guesswork.

#### 3 Vulnerability management is too complex.

Traditional vulnerability management processes are flawed, there's too much manual work and it's built off flawed visibility. You can't see a vulnerability if you can't see the asset.

“

*“With Rebasoft I can now see all my network attached devices - in one system - and validate them for compliance purposes”*

*CISO, charity*

## Rebasoft can solve these issues

Rebasoft is purpose built for modern IT needs. It can help you:

- 1 Comply with cyber security frameworks (Cyber Essentials, CIS, NIST, ISO)
- 2 Cut costs
- 3 Increase productivity
- 4 Prevent data breaches
- 5 Ensure compliance and liability (GDPR, USA law etc.)

### Rebasoft is all-in-one.

Rebasoft offers a range of functionality, all natively integrated. Security can be consolidated, so you can reduce 'tool sprawl'. You staff's lives will be made easier, they won't need to learn and manage a dozen programs.

### Rebasoft is your single source of truth.

Rebasoft doesn't need agents and doesn't rely on scans. We provide a real-time asset inventory so you can have a clear view and a solid foundation for the rest of your security.

### Rebasoft gives better vulnerability coverage.

Rebasoft's unique vulnerability management uses machine learning to match vulnerabilities to assets with 99.9% accuracy. Native integration to asset management means you get better coverage and better security. It tracks vulnerabilities on a per-device basis, meaning you filter out the noise and reduce workflows.

# The Rebasoft Security Platform

Three core solutions, one unified platform.

## See.

- Asset discovery and inventory
- Criticality & prioritisation
- Device details

## Secure.

- Secure configuration
- Network perimeter security
- Malware coverage

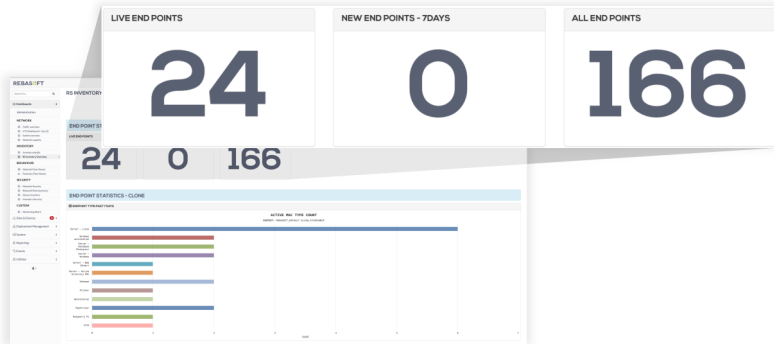

## Defend.

- Vulnerability management
- Network access control
- Behaviour monitoring

## Reporting

Generate accurate reports for audits and compliance with granular control over these areas:

### See.

**Asset discovery & inventory** - Agentless, real-time discovery and inventory of all IT assets

**Criticality & prioritisation**—Take a risk-based approach to security

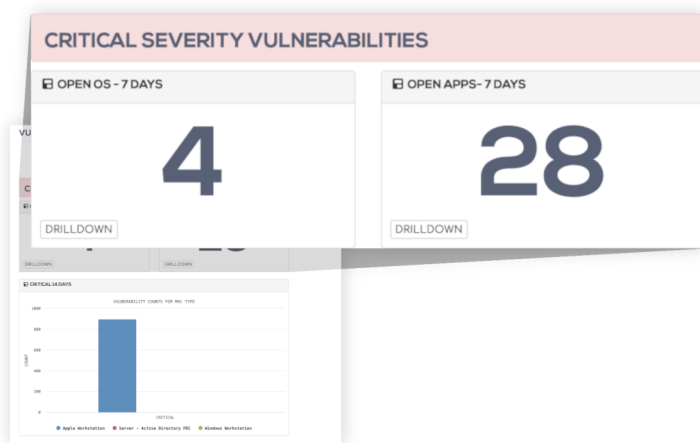

**Device details**—Location, model, operating systems, applications etc.

### Secure.

**Secure configuration** - Identify security configuration issues – controls aligned to CE, NIST, ISO, CIS or STIG

**Network perimeter security**—See and secure all network edge points

**Malware coverage**—See anti-malware coverage on all endpoints

### Defend.

**Vulnerability management** - always-on, asset based vulnerability management

**Behaviour monitoring** - monitor network usage for suspicious activity in real-time

**Network access control** - remove suspicious devices from your network

## Automation

Everything is underpinned by automation, reducing workload and human error.

## Rebasoft advantages

-  **Integrated** – there's no jumping between tools everything is seamlessly integrated, so it's simpler, easier and more effective.
-  **Native discovery** – we don't aggregate data, we provide it fresh, we are your single source of truth
-  **No scans** – less gaps, better visibility, better security
-  **Agentless** – simpler, easier, lower workload and more accurate
-  **Vulnerability** – 'always-on' means it's more accurate, and you can reduce repeats and false positives because we track by asset
-  **Behaviour** – information with network traffic, NetFlow
-  **Additional cost saving** – better value than point solutions and can even replaces some

“

"... if you have a number of alerts being triggered in ten different systems it is quite hard to track them through to conclusion. One system allows us to easily drill through to the issue and rapidly resolve it"

\_\_\_\_\_  
 CIO, Hi-tech

## Competitors

Rebasoft competes and eliminates siloed solutions from the following areas.

- Reducing license cost
- Reducing deployment costs
- Increasing staffing skills and productivity
- Increased coverage
- Reduced security GAPS

## Our customers

Our customers range from SME's all the way up to large enterprises, across all industries.

## Licence

**Subscription** – 1, 3 or 5 years

**Cost is proportional to customer size** – from SMEs to Enterprise

## Route to market - Partnerships

Rebasoft's 100% channel centric approach means providing partners the support and flexibility to solve customers real world problems with an agile solution.

**Product sale** – resell channel

**Service sale** – MSP/MSSP

“

*“We were able to become more effective with fewer systems to operate and use.”*

*IT Director, School*

## About us

Rebasoft is a cyber security systems developer. We believe every business should be able to afford proper security, no matter how large or small. Since 2009 we have strived to give businesses from SMEs all the way up to enterprise, the protection that they deserve.

We work in close collaboration with our customers, developing features based on their feedback and changing business needs.

We are a proudly UK based company.

## Contact us

You can also get in touch via phone or email. We'll happily answer any questions.
